

Harness the power

World Dryer's advanced new World Wind™ wall-mounted hair dryers provide the perfect combination of heat and air velocity — in sleek styles that save valuable counter space and complement any décor.

World Wind dryers are crafted for comfort, safety and reliability, and priced for affordability. All electrical components are isolated to guard against accidental exposure to water, and each hose and hand piece is insulated to prevent uncomfortable heat buildup.

Ideal for hotel rooms, health clubs, swimming pools, dressing rooms and schools, durable World Wind hair dryers are easy to install and use. They activate automatically when the hand piece is removed from the base and turn off when it is replaced.

Contact World Dryer today to learn more.
